

# FinEERGo-Dom Fact Sheet

GREY PAST

2 GREEN FUTURE

## Objective

Building on the experience of the Latvian Baltic Energy Efficiency Facility (LABEEF), the financial scheme deployed successfully in Latvia, the FinEERGo-Dom team will refine and implement guaranteed financing mechanisms for energy efficiency and renewable energy in deep renovations of buildings across the six (6) EU member states. The FinEERGo-Dom team will work with stakeholders from Policy Makers to Final Beneficiaries and will engage in dialogue across the region.

## Concept

The overall concept of the financing mechanism is that it is possible to achieve large scale investment of building renovation by:

- ALIGNING THE INTERESTS
- MEASURING RISKS
- STANDARDIZING PROCESSES AND DOCUMENTATION
- REDUCING TRANSACTION COSTS

The core tool is the SHAREX online platform designed to follow each transaction from initial concept to aggregation while ensuring the highest levels of legal and financial security, transparency and respecting the needs of each stakeholder.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 847059. ### Targeted Results

- Providing safe, healthy and suitable buildings through energy savings;
- Improving the lives of thousands of citizens across Central and Eastern Europe;
- Minimizing energy consumption, currently generated mainly through coal and other fossil fuels;
- Taking action in 6 countries with common stock due to historic legacy and with similar social and economic challenges;
